

# Digipos Freedom Tablet | The World's First Tablet for Retail

## The world's first tablet for retail that will change the customer experience forever!

How best to interact with customers in an increasingly mobile world is a challenge facing retailers who want to embrace the benefits of omni-channel retailing - having a single view of the customer across multiple delivery options - especially mobile. The ability to fulfil customer needs in a timely and relevant manner, engage customers with exciting offers, target them with selected products and provide multiple delivery options will be key to determining success. Knowing how to drive the business forward by harnessing mobile technology and providing a seamless customer experience will make all this possible - and more.

Undock The Freedom 100 and change the customer experience forever:

- Join the customer on the shop floor to create a unique brand experience with assisted selling
- Provide real-time research of products, offers and stock - up sell, on sell, cross sell - and delight your customers
- Select a customer driven delivery option and improve stock utilisation
- Maximise sales conversion and increase brand loyalty by building a profile of offers for your customers while you shop with them
- Move away from static till based selling - your shop assistants can
- offer so much more than a payment transaction
- Eliminate abandoned baskets by seamlessly blending assisted-selling and payment
- PCI transaction enabled when docked

Dock The Freedom 100 for a fully integrated POS and a compelling return on investment.

- Designed to harmonise with your existing Windows and Intel infrastructure.
- Reduction to total cost of ownership.
- Integrates fully with existing POS peripherals and infrastructure.
- Can be managed by in-house IT teams
- Supports proven security and management tools.
- Eliminates need to adopt new disparate technologies
