

A cloud based business management software solution for retailers

OpSuite allows retailers and franchise retailers to manage their entire enterprise, regardless of how many store locations they have, from a single cloud based application, linking with the stores OpSuite PoS.

OpSuite manages Stock, Location Hierarchy, Purchasing, Transfers, Supplier Relationships, Customer Relationships, Promotions, Customer Loyalty and Reporting.

OpSuite Executive Dashboard Screen

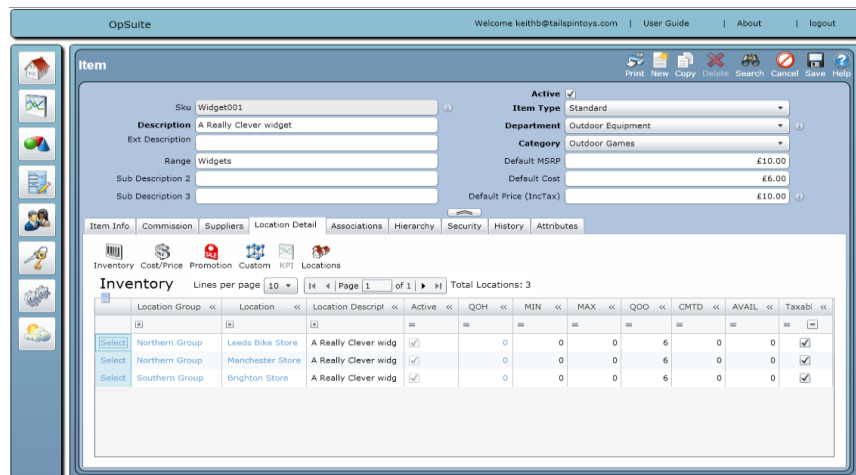

OpSuite gives users the ability to manage their business from anywhere at any time.

It allows users to grow their businesses using the tools they want to use, regardless of the number of stores they have, or plan to have.

Whether an owner, area manager, store manager or store staff, OpSuite allows the access you require through **Location Hierarchies**.

As the owner you can have access to see the whole of your estate whilst a store manager with one or more stores has access only to their data.

Share the data you need and limit the data that is private to each store, such as customer lists and maybe even certain stock lines.

The Item Management screen shows details for 'A Really Clever widget' (SKU: Widget001) and includes an inventory table across 3 locations.

Location Group	Location	Location Description	Active	QOH	MIN	MAX	QOO	CMTD	AVAIL	Taxabl
Select Northern Group	Leeds Bike Store	A Really Clever widg	<input checked="" type="checkbox"/>	0	0	0	6	0	0	<input checked="" type="checkbox"/>
Select Northern Group	Manchester Store	A Really Clever widg	<input checked="" type="checkbox"/>	0	0	0	6	0	0	<input checked="" type="checkbox"/>
Select Southern Group	Brighton Store	A Really Clever widg	<input checked="" type="checkbox"/>	0	0	0	6	0	0	<input checked="" type="checkbox"/>

OpSuite POS at each store integrates fully back to OpSuite providing a single, real time, integrated platform for all of your retail and management processes. This allows you to automate key functions across all departments and locations throughout your business. Corporate employees, store managers, area managers, buyers, and business planners will have a single source for all of the information they need to make key business decisions, allowing them to spend more time building business and less time chasing data.

Manage your entire retail operation from a single cloud based solution
